

The proposed legislation to require broadcasters to record 100 % of their broadcast day would be an incredible burden. I feel this is legislation that is punishing the industry for the actions of a few. Our company has operated our stations in the public interest for many years and will continue to do so. Perhaps stations that have violated the rules could be forced to record their programming for a period of time as part of a settlement with the FCC. The majority of broadcasters follow the rules, please don't put an extra burden on everyone.

Thank you,

Andy Russell
